

Injuries

If a student sustains an injury in school, a parent/guardian will be notified. If this injury requires an evaluation by a physician, the student must bring in a note from the physician stating any restrictions at school. The restrictions should indicate the amount of time to be restricted and if the restrictions are for gym, sports, pool and/or work. If the restrictions indicate "restricted until seen by their physician or a specialist", the student will not be able to return to the restricted activity until this is done.

If a student is injured at home and is seen by their physician or is evaluated in the Emergency room, they will require a note from the physician. This note must contain the same information as indicated above for an injury at school.

If a student has stitches/ staples, they will be excluded from gym/sports/pool until the wound is healed and stitches/staples are removed. If a student has stitches/staples that may interfere with their job assignment, a physician's note is required.
