

Purchase of Books and Supplies for CV-TEC Students

To the extent practically possible, CV-TEC discloses supply and textbook identification information and an estimated retail price based on program of enrollment. Programs that require students to purchase textbooks and/or supplies provide them with the necessary purchasing information. Some programs re-sell textbooks while others have found it more cost effective for the students to purchase textbooks online or through other means.

CV-TEC does not have a college book store, but makes local and online purchasing options known to students (e.g., Amazon.com). CV-TEC's course catalogue notifies students that supplies and/or textbooks may be required by specific programs.
