

CREATING SUICIDE SAFETY IN SCHOOLS

Dec 13, 2016

Instructional Services Center

14 Area Development Drive Plattsburgh, NY

9:00 am - 2:00 pm *Lunch will be provided*

Cost: \$20 per person

Presenter

Bonnie Black Director, Employee Assistance Services (EAS) - a program of Behavioral Health Services North - your Partner in Well-being

This workshop is for school planning teams and administrators. Recognizing that each school is unique, the workshop is designed to help the school assess existing suicide prevention and response readiness as well as provide current best practice in school-based suicide prevention. The goal is to develop a customized implementation plan using free and low-cost, yet best-practice/ evidence-based resources.

Six broad categories of school-based suicide prevention will be discussed:

1. Policies, procedures and standardized protocols
2. Staff and faculty training
3. Promotion of student protective factors
4. Intervening when a student is at risk.
5. Plan for after a suicide death
6. Engagement of family and community supports.

Participants spend time problem-solving and action planning through the use of small and large group discussions, checklist, group planning documents and exposure to resources that meet best practice standards.

This workshop is endorsed by the NYS Association of School Psychologists.
